## FEED FINDER CHART

### 1 Start Right *Broodmares and Growing Horses*

Double conditioned pelleted format.

- Designed for lactating broodmares, foals, and weanlings.
- Excellent for mares in the final stage of gestation and throughout lactation when nutrient demands are highest.
- Soy free with elevated vitamin E.

### 2 Peak Performance *Sport*

Long stem forage (GenAPro), extruded nuggets, and textured grains.

- Designed for performance and growing horses in training, stallions, hard keepers and horses involved in moderate to heavy activity.
- GenAPro mini cubes added for extra fibre and digestible protein.
- Incorporates extruded technology to encourage chewing and saliva production, which supports a healthy gastrointestinal environment.
- High energy source with 10% fat and optimum starch levels for performance and energy requirements with elevated vitamin E.

### 3 GenAPro *Total Forage Replacer*

Mini cubes (large pellets) encourage horses to eat slowly, promoting chewing and saliva production.

- Designed for all horses and activity levels requiring quality forage or when quantity is limited.
- Premium long stem, alfalfa-based product.
- Convenient and easy to feed at home or on the road.
- Low sugar and starch (<10% NSC).
- High protein levels aid growth, performance and muscle condition.

### 4 Low Sugar Lite *High Fibre*

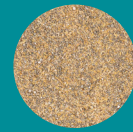

Low sugar, double conditioned pelleted format.

- Designed for horses that have sugar sensitivities and are metabolically compromised.
- Provides energy in the form of fermentable, digestible fibre sources.
- Great for miniature horses, donkeys and other horses prone to founder.
- Aids in weight management, essential energy, supports digestive health and the overall well-being of your horse (<10% NSC).

### 5 Top Up Mineral *Fortifier*

Loose mineral form to be feed as top-dress or feed free choice.

- Low inclusion mineral balancer designed for any horse.
- For superior equine performance, improved hoof health and growth, and improved immune function.
- Feed as a supplement to balance out forage, pasture or non-fortified feeds and grains.
- Trouw Nutrition's IntelliBond® products are the first line of hydroxy trace minerals for use in animal feeds. They feature high bioavailability and low environmental impact.

### 6 Senior *Age Well*

Mix of extruded nugget and double conditioned pellets.

- Designed for older horses, hard keepers, and mature horses having difficulty maintaining condition.
- Easy consumption for horses with dental issues.
- Premium ingredients and added nutrients tailored for senior horse diets.

### 7 Top Up Supplement *Ration Balancer*

A low inclusion, double conditioned, pelleted vitamin and mineral supplement balancer for any horse.

- Fully fortified, 18% protein supplement to balance out forage, pasture or non-fortified feed grains.
- For superior equine performance, improved hoof health and growth, and improved immune function.
- Trouw Nutrition's IntelliBond® products are the first line of hydroxy trace minerals for use in animal feeds. They feature high bioavailability and low environmental impact.

### 8 High Fat *Cool Energy*

Double conditioned, vacuum-infused mini cube pellet to enhance saliva production, which supports a healthy gastrointestinal environment.

- Designed for hard-working performance horses or for horses that require fat sourced energy for weight management.
- High fat and low NSC cool energy feed.
- Vacuum infusion technology for high fat levels and healthy gut microbiome.
- Combination of high non-hydrogenated fat sources and fibre with low non-structural carbohydrates (NSC).
